RESILIENCE WEEK™

Transforming the resilience of critical infrastructure systems and communities across sectors

December 3-5, 2024 | Austin, TX | www.ResilienceWeek.com

Resilience Week is a symposium dedicated to advancing interdisciplinary dialog on policy and technologies that accelerate critical infrastructure and community resilience to unexpected and malicious threats.

31 May — Call for Special Sessions

Submissions will be reviewed with a preference towards:

- New interdisciplinary approaches or perspectives
- Applications-focused work with clear industry relevance
- Interactive sessions

30 June — Call for Papers (No Extension)

Papers* will be reviewed with a preference towards:

- New interdisciplinary approaches or perspectives
- Clear alignment with focus and topical areas
- Papers will be submitted to IEEE for publication in Xplore
- 2 pages minimum, 10 pages maximum.

* Work-in-progress papers (WIPP) may also be submitted and should describe research that has not yet produced the results but that due to its novelty and potential impact deserves to be shared with the community at an early stage. Authors need to identify the paper as a WIPP in the title of the submitted manuscript.

FOCUS AREAS

Securing the Digital Energy Transition	Building Risk-Informed Resilience in Interconnected Critical Infrastructure Systems	Energy Equity and Community Resilience	Cyber Resilience for Critical Functions	Distributed Energy and Grid Systems Integration

PAPER TOPICAL AREAS

Control Systems	Cyber Systems	Supply Chain	Communication Systems	Communities & Infrastructure
